### ANNEXED NOTE

#### 1. Technical Notes and Definitions

The table provides **mid-year intercensal estimates** of Bahrain's total resident population (nationals and non-nationals) by age group.

In October 2015, the Bahraini e-Government Authority merged with the Central Informatics Organization to form the Information and e-Government Authority (IGA), which manages and oversees all national digital assets. The IGA maintains, and is part of, the Government Data Network, established in 1994, which links together 300 governmental entities.

## **Censuses' implementation methods:**

**2010:** mixed census, based on both administrative records and a household survey sample of 15,000 Bahraini and non-Bahraini households.

**Census 2020:** Census 2020 was conducted solely on the basis of administrative records on the de jure population of the Kingdom.

**Population of reference:** all individuals (nationals and non-nationals) usually present within the State's borders during time of reference.

The **nationality** of the person is defined by the passport used to enter the country. A non-Bahraini is considered as such depending on the passport used to enter the country (or obtain the visa)

## **2. Institution which provides data**

Information & eGovernment Authority (IGA)

## **3. Data availability**

Some datasets from census 2020 and estimates of population numbers and characteristics based on the census' results are available on IGA's Bahrain Open Data Portal:
