ANNEXED NOTE

1. Technical Notes and Definitions

Census 2010:

Reference period for census 2010: the night of April 21st, 2010.

Implementation method: census is based on de jure method; i.e. registering people according to their usual place of residence at time of census.

Populations in transit or visiting Qatar as tourists, as well as residents of public housing or visitors staying in a household for less than two months after night of reference were excluded.

Populations away from usual residence in Qatar for reasons of duty, or on a visit abroad for less than two months, as well as individuals with no personal housing within Qatar staying with a household for more than two months, are counted in their usual/ present residence during census night.

Population of reference: all individuals (nationals and non-nationals) present within the State's borders during time of reference, including in labour camps.

Labour force Sample Surveys:

The Statistics Authority conducted the first labor Force Sample Survey in 2001. Starting from 2006, the execution of these surveys came to be on annual basis. In 2013, the Survey was conducted on a quarterly basis.

Labor Force Sample Surveys	Sampling frame	Sample size (households) individuals	Reference period
-------------------------------	-------------------	---	---------------------

	based on independent samples drawn from distinct frames of specially constructed PSUs			
2006		5,492	31,439	March 2006
2007	nd	5,492	31,439	October 2007
2008	nd	6,104	nd	December 2008
2009	nd	6,109	35,839	October 2009
2011	nd	6,920	35,839	March 2011
2012	Census 2010	6,895	37,629	April 2012
2013	Census 2010	8,342	55,771	Quarterly

Reference period for the labor force data: the week prior to the reference date for data collection.

Population of reference: all Qatari and non-Qatari households of the following types: i. Qatari households; ii. Non-Qatari households; iii. Small labor gatherings; iv. Large labor gatherings, present in Qatar on the night of survey/ periods of reference

The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labor camps, students living boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more).

The survey did not cover short periods accommodation, i.e. hotels.

Inactive population:

Full-time student: The person (15 years or older) enrolled in any educational institution as a full-time persistent student with purpose of attaining an academic degree, irrespective of whether the schooling hours are in the morning or evening. Any trainee enrolled in vocational training institutes is regarded as a full-time student.

Full-time housewife: The female (15 years or older) who is fully engaged in home management and family care, and does not practice any other work

Retired: The person who does not look for a job during the week preceding the survey and gets a fixed pension for work he/she had joined before

Disabled: The person (15 years or older) who is not capable of work due to illness, handicap or old age.

Others: Those able to work but not willing to, not enrolled in education, as well as any other cases encountered by the enumerator other than the above mentioned.
