ANNEXED NOTE

1. Technical Notes and Definitions

The table provides intercensal mid-year estimates of Bahrain's total resident population (nationals and non-nationals)

Reference period: mid-year

Population of reference: all nationals and non-nationals in the country

Implementation method: the Censuses are carried out according to de jure methodology, i.e. counting persons using their usual place of residence irrespective of where are they at census times

Nationality of the person is defined by the passport used to enter the country. A Non-Bahrainis is considered as such depending on the passport used to enter the country (or obtain the visa)

* Total populations for nationals and non-nationals are summed using male and

female population figures. Several of the calculated totals differ from the CIO reported total by one or two individuals.

2. Institution which provides data

Central Informatics Organization, known prior to 2001 as the “Central Statistics Organisation” under the Ministry of Cabinet Affairs

3. Data availability

This data is available on the Central Informatics Organisation (CIO) website. For the Arabic version: (http://www.cio.gov.bh/cio_ara/default.aspx). For the English version: (http://www.cio.gov.bh/CIO_ENG/Default.aspx)

Censuses for 1981 and forward break down the population by nationality, sex and age groups, and are published in PDF format

For 1992-2011 estimates:
