ANNEXED NOTE

1. Technical Notes and Definitions

The data is taken from 2016 Labour Force Survey (yearly synthesis)

Sampling frame of LFS 2016: Population Census 2010.

Sample size: 60,016 persons, in 9,199 households: 1- Qatari households; 2- Non-Qatari regular (non-collective) households;

3- Non-Qatari small collective households or labour gatherings (2 – 6 persons); 4- Non-Qatari large collective households or large labour gatherings (7 persons or more).

Data Collection: The sample was divided into equal parts to collect data monthly. Each month 1/3 of the quarterly data were collected during the first two weeks of the month.

Reference period for the labour force data: the week prior to data collection day.

Population of reference: all Qatari and non-Qatari households present in Qatar on the night of survey, living in normal and collective households. The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labour camps, students living boarding schools, nurses in hospitals... etc. The survey covered the small collective

households (includes less than 7 persons) and large collective households (includes 7 persons or more).

The survey did not cover short periods accommodation, i.e. hotels.

The present data concerns employed population in paid employment:

The persons who had work, whether they were working or temporarily not working, and performing their work in exchange for wage and salary, whether in cash or in kind.

2. Institution which provides data

Ministry of Development Planning and Statistics

(<http://www.mdps.gov.qa/en/pages/default.aspx>)

3. Data availability

The Statistics Authority conducted the first labour Force Sample Survey in 2001. Starting from 2006, the execution of these surveys came to be on annual basis, and on a quarterly basis since 2013.

Labour Force Surveys (yearly and quarterly data) can be downloaded from MDPS's website, in PDF and Excel format:
