1. Technical Notes and Definitions

The data is taken from 2015 Labour Force Survey (yearly synthesis)

Sampling frame of LFS 2015: Population Census 2010.

Sample size: 44,756 persons, in 6,953 households: 1- Qatari households; 2- Non-Qatari regular (non-collective) households;

Data Collection: The sample was divided into equal parts to collect data monthly. Each month 1/3 of the quarterly data were collected during the first two weeks of the month.

Reference period for the labour force data: the week prior to data collection day.

Population of reference: all Qatari and non-Qatari households present in Qatar on the night of survey, living in normal and collective households. The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labour camps, students living boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more).
