\* GLMM's estimate, based on data published by the Planning and Statistics Authority (see below).

### **ANNEXED NOTE**

#### **1. Technical Notes and Definitions**

**Reference periods** for each census:

1970: unknown; the nights of March 16th, 1986; March 1st, 1997; March 16th, 2004, April 21st, 2010; April 20th, 2015; December 2020.

**Implementation method:** de facto, as well as de jure methods (1986-2015)

Census 2020 was based on administrative records, supplemented by an online self-enumeration platform, completed with field enumeration.

**Population of reference:** all individuals (nationals and non-nationals), present within the country's borders during night of reference.

– Populations away from usual residence in Qatar for reasons of duty, or on a visit abroad for less than two months, as well as individuals with no personal housing within Qatar staying with a household for more than two months, are counted in their usual/ present residence during census night.

– Populations in transit or visiting Qatar as tourists, as well as residents of public housing or visitors staying in a household for less than two months after night of reference were excluded.

Prior to census 2010, only a sample of foreign residents was covered in censuses.

**2015:** No population data broken down by nationality was published, based on census results.

We **estimated** the numbers of Qataris and non-Qataris, using:

1. 2015 Labour Force Survey (Q2): Figures of population aged 15 and above, by nationality (period of reference: mid-2015)

**Sampling frame** of LFS 2015: Population Census 2010.

**Sample size:** 44,756 persons, in 6,953 households: 1- Qatari households; 2- Non-Qatari regular (non-collective) and collective households;

**Reference period** for the labour force data: the week prior to data collection day.

**Population of reference:** all Qatari and non-Qatari households present in Qatar on the night of survey, living in normal and collective households.

2016. PSA. *Women and Men in the State of Qatar- A Statistical Profile*, Doha: PSA, 2016.

**Figures of population aged 0-14 by nationality (national/ non-national) and sex (period of reference: mid-2015).**

The figures of Qataris and non-Qataris by sex were then **estimated** on the basis of the percentage distribution of population by broad age groups, sex and nationality for mid-2015 (Table 1/3, p. 18).

The figures of Qataris and non-Qataris at the time of census were then calculated, using:

-the ratio of nationals and non-nationals calculated for mid-2015.

-the total figure of the population residing in Qatar during census 2015's date of reference.

**2020:** Figures of total population broken down by nationality (Qataris and non-Qataris) are not readily available in any census publication.

**No alternative, recent enough source was available as of 20 October 2022, to calculate a reliable estimate of the national and non-national populations at the time of census.**

## **2. Institution which provides data**

Ministry of Development Planning and Statistics (MDPS)

currently: Planning and Statistics Authority (PSA)
