### ANNEXED NOTE

#### 1. Technical Notes and Definitions

\* **Figures of population aged 15 and above** are taken from 2015 Labour Force Survey (yearly synthesis)

**Sampling frame of LFS 2015:** Population Census 2010.

**Sample size:** 44,756 persons, in 6,953 households: 1- Qatari households; 2- Non-Qatari regular (non-collective) households;

**Data Collection:** The sample was divided into equal parts to collect data monthly. Each month 1/3 of the quarterly data were collected during the first two weeks of the month.

**Reference period** for the labour force data: the week prior to data collection day.

**Population of reference:** all Qatari and non-Qatari households present in Qatar on the night of survey, living in normal and collective households. The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labour camps, students living boarding schools, nurses in hospitals... etc.

The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more). The

survey did not cover short periods accommodation, i.e. hotels.

\* **Figures of population aged 0-14** by nationality (national/ non-national) and sex: **GLMM author's estimate**, based on the percentage distribution of population by broad age groups, sex and nationality for 2015, available in 2016 issue of report Women and Men in the State of Qatar- A Statistical Profile, published by the MDPS (tab. 1/3, p. 18).
