Source: Annual Bulletin of Labour Force Sample Survey 2022

ANNEXED NOTE

1. Technical Notes and Definitions

The data is taken from Labour Force Survey 2022 (yearly synthesis)

Sampling frame: Population Census 2020.

Sample size: 65,253 persons, in 10,560 households: 1- Qatari households; 2-Non-Qatari regular (non-collective) households; 3- Non-Qatari small collective households or labour gatherings (2 — 6 persons); 4- Non-Qatari large collective households or large labour gatherings (7 persons or more).

The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labour camps, students living in boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more).

Data Collection: The sample was divided into equal parts to collect data monthly. Each month 1/3 of the quarterly data were collected during the first two weeks of the month.

Reference period for the labour force data: the week prior to data collection day.

The survey did not cover short periods accommodation, i.e. hotels.

The present data includes active population, i.e. employed and unemployed. It does not include persons seeking work for the first time

Classifications used: ISCO-88; ISIC Rev. 4.

2. Institution which provides data

Planning and Statistics Authority
