## ANNEXED NOTE

### 1. Technical Notes and Definitions

The data is taken from Labour Force Survey 2022 (yearly synthesis)

**Sampling frame:** Population Census 2020.

**Sample size:** 65,253 persons, in 10,560 households: 1- Qatari households; 2- Non-Qatari regular (non-collective) households; 3- Non-Qatari small collective households or labour gatherings (2 – 6 persons); 4- Non-Qatari large collective households or large labour gatherings (7 persons or more).

The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, i.e. labour camps, students living boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more).

**Data collection:** The sample was divided into equal parts to collect data monthly. Each month 1/3 of the quarterly data were collected during the first two weeks of the month.

**Reference period for the labour force data:** the week prior to data collection day.

**The survey did not cover short periods accommodation, i.e. hotels.**

**Unemployed:**

All persons aged 15 years and over who were, during the week preceding the survey, without work and were willing to work and looking seriously for work.

**First time unemployed:** persons who never worked previously and were during the week preceding the survey looking actively for work.

**Unemployed who previously worked:** persons with previous experience work and during the week preceding the survey were actively looking for work.

**Education level:** highest level completed.

**Classification used:** the Directory of Standard Classification of Education, based on UNESCO's International Standard Classification of Education (ISCED).

Information was coded at the five-digit level and tabulated at the broad level only.
