1. Data collection methodology

LFS were first conducted in 2001 and became bi-annual after 2006. Data were collected through nationally representative household sample surveys, which sampling was based on most recent censuses.

Since 2016, Labour Force Surveys have been conducted and published on a quarterly basis, based on a

household telephone survey conducted by GStat. Employment data extracted from administrative records were also introduced as a complement to the results of Labour Force Surveys in Labour Market Statistics' publications, starting on Q1 2017.

Population of reference: workers subject to the rules and regulations of the General Organization of Social Insurance (GOSI):

a. contributors on the job who are subject to social insurance laws and regulations in the private

and government sector (outside the Civil service);

b. workers who terminated their contribution to social insurance during the quarter.

The present data is taken from administrative records.

GStat Labour Market Statistics

- Saudi employers who work in establishments and not registered in the social insurance

- Non-Saudi staff working in foreign international, political or military missions

3- Non-Saudi employees who come to the Kingdom for work that normally takes less than three months to be completed.
