**Source: Register-based Labour Market Statistics, General Authority for Statistics (GASat)**

### **1. Data collection methodology:**

LFS were first conducted in 2001 and became bi-annual after 2006. Data were collected through nationally representative household sample surveys, which sampling was based on most recent censuses. Since 2016, Labour Force Surveys have been conducted and published on a quarterly basis, based on a household telephone survey conducted by GASat. Employment data extracted from administrative records were also introduced as a complement to the results of Labour Force Surveys in Labour Market Statistics' publications, starting on Q1 2017.

**The present data is taken from administrative records.**

**Population of reference: workers subject to the rules and regulations of the General Organization of Social Insurance (GOSI):**

1. contributors on the job who are subject to social insurance laws and regulations in the private and government sector (outside the Civil service);
2. workers who terminated their contribution to social insurance during the quarter.

Definitions and categories used by GASat in Labour Markets Statistics (employment; unemployment;

occupation and activity sectors, etc.) are based on international standards:

For LFS methodology and definitions, see: <https://www.stats.gov.sa/en/node/9787>.

### **2. Institution which provides data:**

General Authority for Statistics (GASat)

### **3. Data availability:**

Since 2021, GASat has been publishing separately the employment data taken

from administrative

records, and unemployment/inactivity data as well as general indicators, calculated from the results

of the field interviews conducted by GStat (Labour Force Survey).

The present time-series was taken from the Register-based Labour Market Statistics- Q1 to Q4, 2021
