1. Data collection methodology

LFS were first conducted in 2001 and became bi-annual after 2006. Data were collected through nationally representative household sample surveys, which sampling was based on most recent censuses.

Since 2016, Labour Force Surveys have been conducted and published on a quarterly basis, based on a household telephone survey conducted by GStat. Employment data extracted from administrative records were also introduced as a complement to the results of Labour Force Surveys in Labour Market Statistics' publications, starting on Q1 2017.

The present data is taken from administrative records.

GStat Labour Market Statistics:

Estimates of figures and characteristics of employment in Saudi Arabia are taken from administrative records from the following institutions:

– **Ministry of Human Resources and Social Development (MHRSD)** (formerly Ministry of Labour and Social Development):

Supplies data on Government sector's workers.

– **General Organization of Social Insurance (GOSI):**

Supplies data on:

1. contributors on the job who are subject to social insurance laws and regulations in the private and government sectors;
2. workers who terminated their contribution to social insurance during the quarter.

– **National Information Center (NIC):**

Supplies data on domestic workers (data owner: MHRSD).

The category of domestic workers in Arab states encompasses professions performed within the household, such as maids, cooks, waiters, valets, butlers, laundresses, gardeners, gatekeepers, stable-lads, chauffeurs, caretakers, governesses, babysitters, tutors, secretaries etc.

These professions are classified in the class 9700 of section T of the International Standard Industrial Classification of all Economic Activities (ISIC), Rev. 4.

See: Department of Economic and Social Affairs, Statistics Division.
"International Standard Industrial Classification of All Economic Activities

Revision 4," Statistical Papers, Series M No. 4/Rev.4, New York: United Nations, 2008, p. 269
