Statistics Centre (FCSC).

## ANNEXED NOTE

### 1. Characteristics of data

Totals may vary due to the “Not Stated” nationality or gender for some births included in the grand total.

Vital statistics data (births and deaths) are taken from the records of the UAE Ministry of Health and Prevention.

The table presents the total number of live births who were registered in one of the health facilities and hospitals in the country during a specific calendar year.

It also includes children of citizens born abroad who were registered inside the country.

#### Methodology of births and deaths’ registration:
