ANNEXED NOTE

1. Technical Notes and Definitions

Sampling frame of LFB 2012: Population Census 2010.

Sample size: 6895 households and 37629 individuals from: 1- Qatari households; 2- Non-Qatari regular (non-collective) households; 3- Non-Qatari small collective households (2 – 6 persons); 4- Non-Qatari large collective households (7 persons or more).

Reference period for data collection: April 2012.

Reference period for the labor force data: the week prior to the reference period for data collection (April 2012).

Population of reference: all Qatari and non-Qatari households present in Qatar on the night of survey, living in normal and collective households.

The collective households are a group of persons not related to each other and sharing living conditions in a residential unit, I.e. labor camps,

students living boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more).

The survey did not cover short periods accommodation, i.e. hotels.

Unemployed population:

Persons aged 15 years and over who were, during the week preceding the survey, without employment, willing to work and looking seriously for a job.

There is a distinction between two kinds of unemployed persons:

a) First time unemployed: They are the persons who never worked previously, and were during the week preceding the survey looking actively for work.

b) Unemployed who previously worked: They are the persons with a work experience, who during the week preceding the survey were actively looking for a job
